

Versatile IT professional with over 7+ years of experience in technical support, administration, and development. Skilled in resolving complex technical issues across various systems and technologies, including Azure, SQL Server, T-SQL, and Azure Data Factory. Focusing on data analysis, management, and operations. Currently pursuing a Cloud Computing B.S. at Western Governors University.

### Experience Synopsis

- 7+ years of SQL and database administration (MS SQL, MySQL, Azure SQL, DB2) experience.
- 3+ years of Power BI, SSRS, and Jasper reporting experience.
- 3+ years of system & cloud administration, and automation experience (Windows Server, RHEL, Powershell, Bash, Git, GitHub Actions, Docker)
- 10+ years of Excel and data analysis experience.
- 7+ years of customer support and endpoint management experience
- Certified Azure Data Engineer (DP-203), Azure Developer (AZ-204), Azure Database Administrator (DP-300), AWS Solutions Architect - Associate, CompTIA Network+, and CompTIA Security+

### Professional Experience

#### **Premia Group/ Tank Holding Inc., San Antonio, TX**

**Nov 2024 - Present**

##### **IT Specialist**

- Developed and optimized T-SQL, DAX, and Python queries for data analysis, validation, and management. Writing maintainable readable self-documenting code intended to be easily maintained by other developers.
- Engineered data pipelines using Azure Data Factory, Apache Nifi, SSIS, and Python to extract data from web, internal, and partner sources for data warehousing and analysis. Reducing data redundancy, improving data clarity, optimizing transformations and data quality.
- Power BI, SSRS, Excel, and Jaspersoft reports for critical operations and decisions, such as P&L, labor utilization, etc. Engaging with stakeholders to ensure data clarity, effective data visualization and validation. Resulting in faster and more consistent deployments, updates, and improved trust in data quality.
- Implemented GitHub Actions automation pipelines, integrations, and documentation strategies to improve collaboration for a team of developers with a wide range of platforms.
- Managed a critical manufacturing network including on-premises network appliances, SIP devices, and IIoT devices integrated with cloud networking. Successfully leveraging automation tools like Powershell, Azure CLI, and ARM, to automate deployments like VNG and VPN.
- Developed solutions for ERP (Abas, XA) systems using ERP proprietary tools and integrations resulting in many successful updates, feature deployments, integrations and migration.
- Endpoint support and management for critical manufacturing Windows and Linux devices. Developed Powershell and Bash scripts for automated deployment via platforms like Intune, Datto RMM, Sentinel One, and Ninja One, for remediation, monitoring, security, etc.
- Maintained documentation for a large distributed organization, including a security registry covering relevant platforms using composite data from Entra, Intune, Sentinel One Datto RMM, and Defender to evaluate risk and plan relevant impactful remediations for insurance and other considerations.

#### **WellMed Medical Management Inc., San Antonio, TX**

**Nov 2023 - Nov 2024**

##### **Technical Support Analyst**

- Provided thorough ServiceNow tickets notes and managed a service queue. Wrote and updated many knowledgebase articles with clear workflows, graphics, and technical writing for users and agents, with regular communications and timely updates.

- Supported Citrix, VMWare Horizon Client workspaces, Cisco Secure Client VPN, Network appliances, Windows devices, android devices, and iOS devices using PowerShell, Command Prompt, and various admin portals.
- Active Directory access management and MS365 administration for devices and users over a diverse estate. Utilized Tableau reports, Power BI reports, Excel reports, log files, and ticket records to resolve issues, and complete services requested by users.
- Developed automation solutions for bulk administrative tasks using PowerShell to integrate components from Active Directory, MS Graph, ServiceNow API, SharePoint, and Power Apps.
- Wrote SQL queries to transform data for Power BI reports. Utilized Excel for analysis and preparation of data for Power BI reporting.
- Piloted a project for the support and integration of MFA adoption of various services to meet business needs and security compliance.
- Developed documentation MS Word, PowerPoint, and Visio for agents, end users, and management for the support of security compliance. Provided concise and relevant information and guidance for the role of the user.

#### **Tri-Star Staffing, San Antonio, TX**

**Mar 2020 – Nov 2023**

##### **Help Desk Support**

- Guided banking customers through changing technologies, resolved technical issues, and escalated tickets for other specialized departments, all while keeping thorough notes. Utilizing and contributing to Excel reports to resolve users' issues and provide data insights.
- Utilized ServiceNow ticketing and RDP to diagnose, troubleshoot, resolve, and escalate technical issues. Primarily with Windows 8/10, Android, iOS, Office 365, and various vendor services.

#### **Prime Web Design, San Antonio, TX**

**Apr 2018 – Jul 2019**

##### **WordPress Developer**

- Developed design elements, wireframes, and themes for WordPress based websites using Figma, Adobe Photoshop, Illustrator, HTML, CSS, JavaScript, and WordPress plugins. Migrated live production resources to new hosting and managed MySQL databases for LAMP stack development.
- Optimized mobile first, multi-platform, UX, UI, PageSpeed, business functionality, and resolved any issues with the tools and services such as domain controllers, DNS records, web server log files, SSL certificates, and third-party integration.
- Configured Google Search Console for SEO data and Google Analytics reports and dashboards. Configured Google Ad Sense, Facebook Ads, and Mailchimp campaigns for targeted AB testing and broader campaigns.
- Gathered requirements from clients for feature and design updates using Dynamics 365 CRM. Provided technical support to clients through email and phone, by guiding clients through workflows and features.

## **EDUCATION**

#### **Bachelor of Science in Cloud Computing**

**In Progress, Expected Nov 2025**

Western Governors University

#### **Bachelor of Science in Physics**

**Fall 2013 – Summer 2017**

Texas A&M University – College Station

- 90 hours towards a degree

## **Certifications**

- CompTIA Network+, Security+, Data+
- ITIL v4 Foundations
- AWS Solutions Architect Associate
- Azure Administrator Associate (AZ-104), Azure Data Engineer (DP-203), Azure Developer (AZ-204), Azure Database Administrator (DP-300)
